Education

B.M.S College of Engineering Bangalore

*Bachelor of Engineering in Electronics and Instrumentation , CGPA: **7/10*** *November 2022- June 2026*

Experience

DevOps Intern: Sakha Global (Service based MNC company) September 2025 – February 2026

Assisted in developing and optimizing **Docker files** for deployment, resulting in faster and more reliable software delivery. **Containerized application** microservices using Docker and managed orchestrations with **Kubernetes**, improving deployment consistency across environments. Monitored using **Prometheus** for Kubernetes. (**6 Months of Experience**)

DevOps Intern: Octagon Bock Private Ltd February 2026 – May 2026(ongoing)

Worked on scaling a smart mobility platform by supporting **microservices adoption**, **Docker-based containerization**, and **Kubernetes orchestration**, while contributing to backend optimization and scalable database design for high-traffic, real-time systems powering mobility and autonomous vehicle infrastructure. (**4 months of Experience)**

Projects

Full-Stack Attendance Portal – Containerized Cloud Deployment | *AWS, Docker, JavaScript, Gitlab*

Developed and deployed a **full-stack attendance portal** by containerizing backend and frontend services using Docker and Docker Compose. Implemented **Nginx** as a reverse proxy, configured **container networking** for inter-service communication, and deployed the application on **AWS EC2** with proper port exposure and live hosting configuration.

Multi-Instance Cloud Deployment – Flutter Full-Stack Application | *AWS, Docker, Flutter, Prometheus, Gitlab*

Designed and deployed a containerized full-stack Flutter application using Docker and on AWS EC2. Hosted **frontend** and **backend** services on a **primary EC2** instance while isolating the **database on a separate EC2** instance with restricted network access using security groups. Implemented container networking for secure communication and integrated **Prometheus** for monitoring application, ensuring performance reliability.

Technical Skills

Languages: Python, JavaScript,

Skills: Linux, Docker, Kubernetes, Git, GitHub, CI/CD(GitHub), AWS, Terraform, Prometheus, Flutter

Courses & Certifications

Google professional cybersecurity
Full stack Web Development
DevOps Zero to Hero Certificate
DevOps Cloud Practitioner Certificate

Summary

Electronics and Instrumentation Engineering undergraduate skilled in Python, Git/GitHub, and application development. **Fast learner**, **adaptable**, and **flexible**, with a strong interest in **DevOps** and **cloud computing**.
Passionate about exploring emerging technologies and **building innovative solutions**. The ability to work effectively in **dynamic environments**. Continuously learning to stay ahead in the ever-evolving tech landscape.
